

Improve work efficiency by sorting the stud bolt direction

THI-SBT

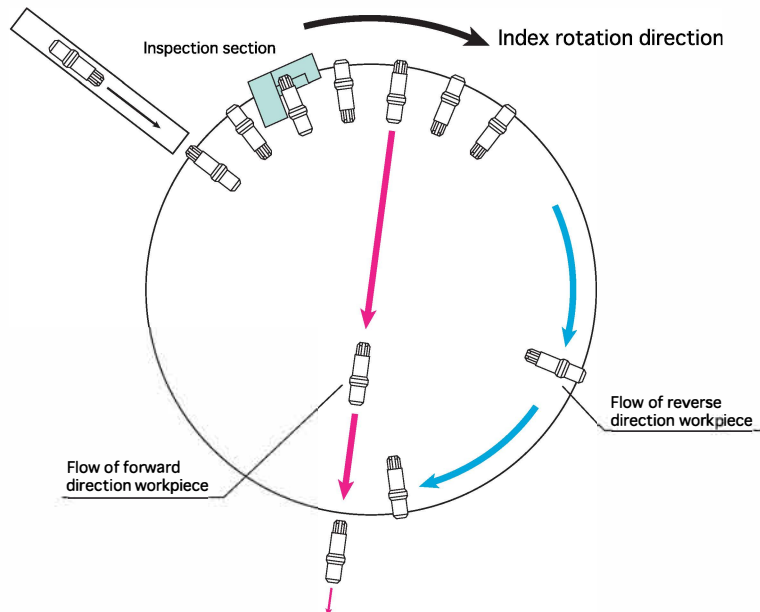

Automatic stud bolt direction sorting device **STUD FEED EQUIPMENT**

	Threads without points				Speeds RPM	Power	Reverts feeding
	Min	Max	Min	Max			
							
SBT250	21	65	5	10	75 110	90W	φ 500
SBT380	25	92	6	12	60 81	90W	φ 600

Mechanism of automatic direction sorting device

- The randomly supplied stud bolts are checked at the inspection section. If the stud bolt is in the forward direction, it is fed to the next process. If the direction is reversed, the stud bolt is rotated half a turn to align the direction before feeding.
