

# HOD SERIES

## Oil Separation System

The oil separation system is suitable for bolts, nuts and any kind of hardware products. The high rotational speed ensures that oil is separated in each operation. This system is including three components which are lift, oil separator and chips removing vibrator.

|                               |       |
|-------------------------------|-------|
| MODEL                         | 400KG |
| L                             | 5875  |
| W                             | 2501  |
| HM                            | 2875  |
| MAX. POWER CONSUMPTION (kw/h) | 9.9KW |
